

Our mission:

To expand access to high quality dental care for underserved communities

Despite the United States' status as the wealthiest country, the U.S. Surgeon General concluded that oral care is the #1 unmet healthcare need for children. Over 50 percent of 5- to 9-year-old children have at least one cavity or filling, and that proportion increases to 78 percent among 17-year-olds. Oral health is essential to the general health and well-being of our children and plays a critical role in their ability to succeed in school and acquire positive self-esteem.

Our vision:

To provide high quality dental care to children

New Benevis, Inc.

In 2002, our founding dentists envisioned a company that could provide needed dental care to often underserved communities, while helping dentists manage the day-to-day administrative burdens of operating a dental office. Over the years, we have grown to over 2 million patient visits per year and expanded our service offerings to become an industry leader in providing non-clinical, business support services to dental practices in 17 states

The New Benevis Advantage

Benevis provides dental practice management services to nearly 200 supported practices across the country. Our practice management services include marketing, purchasing, information technology, compliance, finance/accounting, human resources and legal support. Our supported offices provide families with a dental home, including orthodontic and specialty care in a professional and compassionate environment. This approach allows doctors and team members to grow both professionally and personally while improving the lives of their patients through access to high quality, affordable dental care and furthering our dream of a world of happy, healthy smiles.

Providing comprehensive, high quality
general dental care to children and
young adults, ages 1-20

who we are

We provide comprehensive dental services to children and young adults ages 1 through 20 years. We accept most health insurance plans including Medicaid and local State Children's Health Insurance Program (SCHIP). We opened our first office in 2002 and have helped thousands of children across the United States receive the dental care they need.

responding to a need

The U.S. Surgeon General concluded that oral care is the #1 unmet healthcare need for children throughout America. At Benevis, we offer professional and timely dental services to children in hopes of making a difference in their overall health and lives.

community partnership & outreach:

Benevis collaborates with local schools, daycare centers, pediatric medical offices, and various community and health organizations to ensure that all children in our community receive the healthcare that they need and rightly deserve. Benevis provides at no charge:

- Dental Screenings
- Parent Oral Health Education
- Child/Student Oral Health Education
- Professional Oral Health Information

our dentists

Our dentists are carefully selected and have earned a Doctor of Dental Surgery (DDS) or Doctor of Dental Medicine (DMD) from a fully accredited dental school. Upon joining the Franklin team, each dentist is given several weeks of clinical and classroom training in current evidence-based treatments and the Franklin mission. The services provided by our dentists are evaluated weekly to ensure that their performance meets or exceeds the Medicaid treatment guidelines and meets all federal and local standards. Each dentist undergoes a semi-annual audit of their treatment records. We offer a comprehensive range of general dental care including:

- Preventative care
- Diagnostic imaging
- Restorative care including endodontics

our offices

Our offices are designed to meet our patients' needs. Our newly constructed offices facilitate communication between our patients and our doctors, and provide an enjoyable atmosphere for children. Our equipment is state-of-the-art; we believe that the best equipment is vital to providing the very best patient care.
